## Modell 30

Fahrradständer in rechteckigem Stahlrohr, an welchem ein oder mehrere Fahrräder abgestellt werden können.

Um eine sichere Fixierung vor Ort zu gewährleisten, kann diese Serie von Fahrradständern am Boden eingedübelt und verschraubt, oder direkt in ein Fundament einbetoniert werden.

Durch das schlichte und zeitgenössische Design sind sie ideal, um in der Nähe von Schulen, Parks und Einkaufszentren montiert zu werden.
